Cookeville, Tennessee 38501

Subject: Sustainment Brigade Administration Facility W912QR-12-C-0030
Fort Campbell, Kentucky

Dear Mr. Stites:

TKO Fire Protection was pleased to work with J&S Construction Company to complete the Sustainment Brigade Administration Facility at Fort Campbell, Kentucky.

TKO Fire Protection has completed other projects with J&S Construction at Fort Campbell and as in the past this project was a great success.

Throughout the entire project your Project Manager and your Job Superintendent worked with TKO to provide an excellent facility for the end user.

The Sustainment Brigade Administration Facility is LEED Silver.

It was a pleasure working on one of the most, if not the most energy efficient project on Fort Campbell's Base.

Ft. Campbell's first LEED Gold Certification came when J&S Construction completed the Equipment Maintenance and Supply Complex in August 2010. TKO Fire Protection was again part of the J&S team.

It is always a great pleasure to share the excitement of quality people and quality workmanship as J&S Construction exemplifies.

Sincerely,
TKO Fire Protection

Glenn Cherry
President
